3M™ Wireless Communication System Model XT-1

Fully Digital System Keeps Your Operation Running Smoothly

- Network-ready connectivity can provide more responsive service support and easy access to critical information
- Advanced technology provides enhanced digital sound quality
- System settings are password protected—preventing unauthorized adjustments

Smart Technology Enhances Drive-Thru Productivity

- Minimize costs associated with downtime and service calls
- Remote diagnostics and system settings facilitate off-site support
- Service request can be generated directly from the base station
- Automated system monitor can trigger remote service and support assistance
- Alert messaging provides helpful voice prompts

Advanced Sound Clarity Increases Customer Satisfaction

- Digital dynamic noise reduction improves inbound audio clarity and adds new levels of noise filtering
- Acoustic Echo Cancellation (AEC) automatically identifies and suppresses echoes associated with digital communications
- Automatic Gain Control (AGC) reduces volume variability to improve communication effectiveness
- Spread spectrum technology can significantly reduce interference to maintain high quality communication
